Nature's Creation® Root Stimulator stimulates root development by supplying natural plant growth hormones including cytokinins and auxins from *Ascophyllum nodosum* kelp (seaweed). As a natural biostimulant it helps plants through the stress of transplanting. Nature's Creation® Root Stimulator enhances the growth of beneficial soil microorganisms that support plant growth and nutrient absorption.

DIRECTIONS FOR USE

Trees & Shrubs:

Mix Nature's Creation® Root Stimulator at the rate of 3 Tbsp./gal. Soak the root ball of the tree or shrub prior to planting. Reapply three weeks after planting.

Annuals & Perennials:

Mix Nature's Creation® Root Stimulator at the rate of

2 Tbsp./gal. Thoroughly soak roots immediately after planting. Reapply three weeks after planting.

Vegetables & Fruits:

Mix Nature's Creation® Root Stimulator at the rate of 2 Tbsp./gal. Thoroughly soak roots immediately after planting. Reapply three weeks after planting.

Cuttings:

Mix Nature's Creation® Root Stimulator at the rate of 4 Tbsp./gal. Soak the cutting in the solution for 24 hours before planting.

Lawns:

Mix Nature's Creation® Root Stimulator at the rate of 6 Tbsp./gal. to cover 1,000 sq. ft. of newly planted or established turfgrasses. Use this product as a supplement to your normal lawn fertilization program.
