**Nature's Creation Premium Lawn and Garden Fertilizer 6-1-2** is a unique, all natural, pleasant smelling plant food that provides exceptional results on all lawn grasses, roses, vegetable gardens, annuals, perennials, trees and shrubs.

After water is applied, the clean, uniform pellets expand and breakdown to release their nutrition content to feed hungry plants and naturally occurring beneficial soil microorganisms. The soil microorganisms then grow and thrive to process organic matter present in the soil into elemental nutrient compounds that are readily absorbed by plant roots.

The unique formula contains no manures or animal byproducts of any kind. It is, if you will, a vegan formula.

#### Take a Look at Our Amazing Ingredients:

Cottonseed Meal	Alfalfa Meal
Sunflower Meal	Soybean Meal
Dried Cane Molasses	Rice Bran
Corn Gluten Meal	Diatomaceous Earth
Soybean Oil	Langbeinite
Magnesium Mica	Sulfur
Iron Sulfate	

Plus three easily absorbed amino acid complexes:  
Iron Amino Acid Complex  
Zinc Amino Acid Complex  
Manganese Amino Acid Complex  
Just like in human nutrition, amino acid complexes are easily utilized by plants and the microorganisms living in the soil.
