#### About Nature's Creation® Tejas GreenSand:

The name and color are derived from the presence of the mineral Glauconite. Glauconite is an iron potassium silicate formed from ancient sea bed deposits. Unlike other sedimentary minerals, **Nature's Creation® Tejas GreenSand** was formed from anoxic (oxygen depleted) waters with lots of organic matter and very little input from rivers or other common sources of sediment. **Nature's Creation® Tejas GreenSand** is mined from areas that were under water millions of years ago. Although its physical structure is sedimentary, rather than volcanic in origin, **Nature's Creation® Tejas GreenSand** is very porous with great moisture holding capacity and remains friable without compacting. Millions of tons of greensand have been mined and spread since the 19th Century. It is an excellent soil amendment. It reduces soil compaction in clay soils and adds moisture and nutrient retention to sandy soils.

**Turfgrass:** Apply 10 lbs. of **Nature's Creation® Tejas GreenSand** per 1,000 sq. ft. on new and existing turfgrasses 3 times a year. Water in thoroughly.

**Potted or Container Plants:** Mix 1/4 lb. of **Nature's Creation® Tejas GreenSand** for every gallon of container size, 3 times a year. Water in thoroughly.

**Annuals & Perennials:** Apply 5 lbs. of **Nature's Creation® Tejas GreenSand** per 100 sq. ft. when preparing for planting. Water in thoroughly.

**Roses:** Use 1/2 lb. of **Nature's Creation® Tejas GreenSand** for every gallon of container size prior to planting. For existing plants apply 1/2 cup around the base of the rose 3 times a year. Water in thoroughly.

**Vegetable Gardens:** Mix 5-10 lbs. of **Nature's Creation® Tejas GreenSand** per 10'x10' in the existing planted area or the area to be planted. Water in thoroughly.

**Trees & Shrubs:** Prepare a hole 1/3 – 1/2 larger than the root ball of the shrub or tree. Mix 20% of **Nature's Creation® Tejas GreenSand** with the planting mix or the existing soil. Fill the hole with prepared mix. The root ball should be level with the ground. Water in thoroughly.
