- Adds Organic Matter
- Encourages Beneficial Microbial Soil Activity
- High Nutrient Content
- Increases Soil Water Retention
- Safe For All Plants

Nature's Creation® Horticultural Molasses is the best way to help build beneficial soil microorganism populations. It enriches and conditions the complex soil system by providing essential sugar and carbon. A healthy population of beneficial microorganisms helps breakdown organic matter providing nutrition for plants. When used as directed, this product will not harm beneficial insects, soil organisms, aquatic species or wildlife. Apply to soil as a drench or spray for foliar application. May be mixed with liquid fertilizers.

DIRECTIONS

When applied to the soil, mix 1 to 2 tablespoons per gallon of water for every 25 sq. ft. of area and apply as needed. When used with foliar sprays, mix 1 to 2 tablespoons per gallon of water. Foliar sprays should not be applied during the heat of the day.
